2155

DATE MAILED: 03/21/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 10/004,883	Applicant(s) CHEN, JERRY	
	Examiner Shabana Qureshi	Art Unit 2155	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 12/7/01.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-8 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-8 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 07 December 2001 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-8 are rejected under 35 U.S.C. 102(e) as being anticipated by Kronz (U.S. Patent No. 6,675,196).

In regard to claims 1 and 4, Kronz teaches a method for wireless management of a server, comprising the steps of:

providing an electronic apparatus that is operable so as to issue commands for the server (column 2, line 66 – column 3, line 3);

connecting a first wireless transmission device to the electronic apparatus, the first wireless transmission device having a first identification code exclusive thereto (column 6, lines 5-13; column 9, line 54 – column 10, line 16);

connecting a second wireless transmission device to the server, the second wireless transmission device having a second identification code exclusive thereto (column 6, lines 5-13; column 9, line 54 – column 10, line 16);

Art Unit: 2155

storing the second identification code in the first wireless transmission device (column 9, line 54 – column 10, line 16); and

establishing a wireless communications link between the electronic apparatus and the server via the first and second wireless transmission devices (column 6, lines 5-13);

wherein, when the electronic apparatus is operated to issue a command to the server, the first wireless transmission device transmits a wireless output that includes the command, the first identification code exclusive to the first wireless transmission device to serve as an origin code, and the second identification code exclusive to the second wireless transmission device to serve as a destination code (column 6, lines 5-13; column 9, line 54 – column 10, line 16); and

wherein, when the second wireless transmission device receives the wireless output, the second wireless transmission device provides the command in the wireless output to the server only upon verification that the destination code matches the second identification code exclusive thereto (column 9, line 54 – column 10, line 16).

As per claims 2 and 5, Kronz teaches the method of claims 1 and 4, wherein the second wireless transmission device stores the first identification code therein upon verification that the destination code matches the second identification code exclusive thereto (column 9, line 54 – column 10, line 16; column 8 line 1 – column 13, line 30).

As per claims 3 and 6, Kronz teaches the method of claims 2 and 5, the server being capable of generating a warning signal upon detection of a server abnormality or server problem

Art Unit: 2155

and of providing a monitoring report in response to a request from the electronic apparatus (column 13, line 65 – column 14, line 8),

wherein, upon receipt of either one of the warning signal and the monitoring report from the server, the second wireless transmission device transmits a wireless signal that includes said either one of the warning signal and the monitoring report, the first identification code exclusive to the first wireless transmission device to serve as a destination code, and the second identification code exclusive to the second wireless transmission device to serve as an origin code (column 13, line 65 – column 14, line 8), and

wherein, when the first wireless transmission device receives the wireless signal, the first wireless transmission device provides said either one of the warning signal and the monitoring report in the wireless signal to the electronic apparatus only upon verification that the destination code matches the first identification code exclusive thereto (column 13, line 65 – column 14, line 8; column 9, line 54 – column 10, line 16; column 8 line 1 – column 13, line 30).

As per claim 7, Kronz teaches the system of claim 6, wherein said electronic apparatus is one of a personal computer, a workstation, a personal digital assistant and a notebook computer (column 4, lines 41-47).

As per claim 8, Kronz teaches the system of claim 6, wherein the wireless communications link conforms to one of the infrared communication standard, the Bluetooth communication standard, the IEEE 802.11b communication standard, and the Wireless Application Protocol (column 5, lines 40-52).

Art Unit: 2155

Conclusion

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shabana Qureshi whose telephone number is (571) 272-3990. The examiner can normally be reached on Monday - Thursday, 9:30 am to 6:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hosain T. Alam can be reached on (571) 272-3978. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
